We are starting with the questions. So first question is very simple. I want you to tell us about your background and how long you've been working with the quotes or with command itself as a system.

Steven Eeles 0 minutes 22 seconds
Yep, so I originally started with Mawsons four years ago, 4 1/2, coming up five in March. Must be time to get a new job.
Steven Eeles 0 minutes 36 seconds
This is recorded. Sorry. So I started as a concrete coordinator based in Cohuna, entering quotes, turning over projects, adjusting pricing in regards to

customer pricing and fixing little errors like that. I've been in my current role for two years.
Steven Eeles 1 minute 7 seconds
Yep, two years, and yeah, so two years in the same systems, but now I am a costing manager, so I cost all the...
Steven Eeles 1 minute 18 seconds
Concrete plants, concrete mixes, all their internal, external aggregates and sand for them to resale on to the general public.

Yeah.
Steven Eeles 1 minute 39 seconds

Magdalena Viglione Lara - Globant 1 minute 45 seconds
Yeah.
Magdalena Viglione Lara - Globant 1 minute 48 seconds
Okay, so hopefully this tool will be very helpful for you as well.
Magdalena Viglione Lara - Globant 1 minute 54 seconds

Now, can you walk me through a normal morning in your day and what are the tools that you open first? What is the sequence of tasks that you follow normally?

SE

Steven Eeles

Steven Eeles 2 minutes 5 seconds
Yep, so basically day starts at about 7.30 when we get into the office. First thing I open up is like your emails, then commands, all our reporting services tools. So we'll do command quote, command
Steven Eeles 2 minutes 26 seconds
cartage, command, concrete, emails, and then we go through yesterday's orders to ensure that they're all correct, our cash sales are up to date. We do, once we've done the cash sales, then we'll move on to the customer sales.
Steven Eeles 2 minutes 45 seconds
the customer accounts and cheque that all of their pricing is current and up to date. If they've done a job at another plant, have they received their discount? If not, then we go and apply their discount in the background and update their order. And eventually it's 9:00 and you've finally started your date.
Steven Eeles 3 minutes 7 seconds
Entering emails and friend calls.

Okay.
Magdalena Viglione Lara - Globant 3 minutes 12 seconds
So you mentioned a couple of systems there. Definitely Command QC is the first one that you open. It might be during this session or we can have a separate session from that, but it would be great if at some point you can walk us through what you're doing command itself, because that's...

So what we kind of look for is proximity to the plant, which is closer, how much they require. Are they a current or previous customer? Are they a customer of our country Concrete who is under the same banner, but might not have a
Steven Eeles 5 minutes 37 seconds
account with Mawsons. Yeah, do they have customer discount pricing? Are they on no sale? Are they? Yeah, there is a lot that we actually look into before we can actually let the quote go any further. So, that's for us.
Steven Eeles 5 minutes 55 seconds
That's super and standard, yeah. And then we've got the sort of the bigger quotes as well to come through. The bigger quotes, we obviously, yeah, ask for specifications, then they go to technical, Steve's involved, depending on where it is, whether it's mobile or fixed plant, majority mobile.
Steven Eeles 6 minutes 17 seconds
Steve, myself, Rob Pople are involved, Technical. Yeah. Sorry. That's the one that I'm most familiar with, Maggie, that I've explained. You sort of go and you get the quote from the cement suppliers and then we're going to get a quote through from our own internal aggregates and sands.

It.

Steven Eeles 8 minutes 14 seconds
A standard quote would be driveway, house lab, sheds, just your everyday mum and dad type.
Steven Eeles 8 minutes 27 seconds
Concrete, yeah, yeah, yeah. The bigger ones would be for dairy factory floor slabs.
Steven Eeles 8 minutes 41 seconds
Multi-sub like subdivision estates where they're all going for the same build, power stations, anything that's probably over 1000 cubic metres would be classified as a bigger job. Anything less than maybe 2 would be considered as just your standard everyday

Technical requirements that were quite difficult, that would still trigger a different. Yes, you can put a matrix together around this, Maggie, and still not catch it on. Like, it's you just sort of go with the vibe, yeah.

Magdalena Viglione Lara - Globant
9 minutes 30 seconds
9:30
Magdalena Viglione Lara - Globant 9 minutes 30 seconds
Yeah, yeah.
Magdalena Viglione Lara - Globant 9 minutes 35 seconds
Okay, so maybe question for you, Steve, shall we target both types of quotes in this case?

SE

Steven Eeles
9 minutes 42 seconds
9:42

Magdalena Viglione Lara - Globant
9 minutes 46 seconds
9:46
Magdalena Viglione Lara - Globant 9 minutes 46 seconds
Okay, so in one of the cases, meaning the bigger quotes, we'll have the inputs coming from the technical team. And for the standard ones, this can be completely managed by the costing team, right?

10:39
Steven Eeles 10 minutes 39 seconds
No, when would...
Steven Eeles 10 minutes 41 seconds
Correct, yeah. Yes, yeah. We do have reporting services on it and we can also look in command to find whether or not they have a, whether they have specific customer pricing or whether they're just on a flat straight list price.

Magdalena Viglione Lara - Globant
10 minutes 59 seconds
10:59
Magdalena Viglione Lara - Globant 10 minutes 59 seconds
Okay, perfect. Do you necessarily need to apply the customer discount or there is an option for you to choose there or for someone else to choose whether the discount applies or not?

SE

Steven Eeles
11 minutes 12 seconds
11:12
Steven Eeles 11 minutes 12 seconds
Yep, so we can then, when we send it on to the plant manager or the regional manager, we can just let them know this customer gets $40 off in region one and two. So they can take that into consideration.
Steven Eeles 11 minutes 32 seconds
If they want to use one of those discounts, they're more than welcome. If they don't want to, they don't have to. It's more just to let them know that this customer is on like a discounted rate in these areas. Feel free to apply it if you don't worry about it type thing. Go with your own.

Do you use the same costume file for any type of ports? So would it be the same for a standard one and a bigger one?

SE

Steven Eeles
13 minutes 19 seconds
13:19

Steven Eeles 13 minutes 19 seconds

Sorry.

Steven Eeles 13 minutes 26 seconds

Yes, so we use the same costing procedures and the costing sheets, just depending on, yeah, whether we just give them a list price. So we just give the plant manager and the RM a list price that they,

Magdalena Viglione Lara - Globant

Magdalena Viglione Lara - Globant
14 minutes 3 seconds
14:03

Magdalena Viglione Lara - Globant 14 minutes 3 seconds
Okay, that makes sense.
Magdalena Viglione Lara - Globant 14 minutes 6 seconds

14 minutes 41 seconds

14:41

Steven Eeles 14 minutes 41 seconds

The cement content is...

enough in regards to what it should be for the MPA. So golden rule is if it's 25 MPA, it's 280 kilos of cement, 32 is 320 and continues down the track.

Steven Eeles 15 minutes 5 seconds

So once we cheque that, there we can go and start implementing that into our crossing sheet to be able to move on to the next step.

Magdalena Viglione Lara - Globant

15 minutes 14 seconds

15:14

Magdalena Viglione Lara - Globant 15 minutes 14 seconds

Okay, and how do you put the information into a costing sheet? Is it manually? Do you copy and paste?

SE

Steven Eeles

15 minutes 21 seconds

manually. So we'll have two screens, one with the mixed design, one with our costing sheet. So we're looking at that and just manually entering it in on the side, like into the spreadsheet.

Magdalena Viglione Lara - Globant

15 minutes 35 seconds

15:35

Magdalena Viglione Lara - Globant 15 minutes 35 seconds

Okay, that takes time, right?

SE

Steven Eeles

15 minutes 37 seconds

15:37

Steven Eeles 15 minutes 37 seconds

Yeah. And then you need to make sure, especially if there's three or four mixes, that's, yeah, you need to make sure that you're not getting confused and that you've made sure that this one's correct,

that one's correct. And some of them might have different ags, like one might just have a straight 10 mil where the other ones have got a

A 14-10 blend with a 20 and some may have a 7. So there's a lot of variance that you need to cheque, which can be a little bit time consuming. And then when you've got pressure coming from the plant manager and the regional manager to get it done, that's where you make little mistakes.

Magdalena Viglione Lara - Globant
16 minutes 17 seconds
16:17
Magdalena Viglione Lara - Globant 16 minutes 17 seconds

And the rest of our, a lot of our plants use what we call ICR, which is independent cement and limestone based out of Port Melbourne. So we kind of know what type of cement should be in it. So if it's
Steven Eeles 17 minutes 8 seconds
If it's not a ICL, then we question it. If it's not a Adbri, we question it. And but normally we don't really have to question the cement at all, because the correct, the correct one, and it's normally within the same kilogrammes that it needs to be.
Steven Eeles 17 minutes 29 seconds
That's usually dictated by technical. Yeah. So when the mixed design comes out, it should have the appropriate cement, aggregates, sand, admixtures. Yeah. In the perfect world, yes. Yeah. Yeah, in the perfect world.

The only time that we change a margin on a quote is if they're requesting a discount. That's the only time we drop down on margins. If

the regional manager or the plant manager requests a discount and that's when obviously our margins come down. So we'll go and reflect that in our costing sheet to show what these, the

requests they want or the discount they want. What are our margins? Because they're different in the projects we're working on. It is completely different in our world, like in the mobile world, it's different.
Steven Eeles 22 minutes 29 seconds
Yeah. But most of them are sitting around about, I think it's between 130 and 14160. And that's individual plan. Every individual plan has its own margin set. Correct, yeah. Yeah, there you go. There's answered that earlier question.

ex works and then a cartage. So we send our trucks down to pick up the cement and then the trucks get paid a certain dollar a K for to bring the cement. So it all depends on what the cartage rate is and the ex works rate is. We combine them
Steven Eeles 29 minutes 35 seconds

Yeah, it is probably not.

Steven Eeles 42 minutes 8 seconds

Not a great deal at a bit more time consuming checking the mixes to ensure that everything is like the right cement, right ag, right to hand. Yeah. And then double checking that the prices are correct. Like even though we do that monthly, in the back of your head, you still just religiously go and cheque the price because that's...

Just working too, yeah, and that's probably more the more time consuming, but the quotes, bang, done, quotes, easy, yep, easy, right, yeah, the more the more tedious, like the probably most tedious part of it is actually having to put in their name, telephone number, e-mail address.

Steven Eeles 43 minutes 9 seconds
That's, yeah, yeah, if you can punch out quotes in five, 10 minutes, this thing's not going to be able to do it any faster, I don't think. Maybe. I don't know. We'll see what we can do, but yeah. Yeah.

Like I'm trying to clean them up at the moment. I'm going back as far as 2025 to put the stuff away. I just haven't had time to.

Steven Eeles 44 minutes 36 seconds
But, at least...
Steven Eeles 44 minutes 38 seconds
because I know that I'll be stuck in a meeting or I'm busy training, so they won't annoy me, or when I'm annoying, they won't ring when they probably should.
